

# Modular switch range – Rocker Switch

www.dignet.net.au

Master

Slave

Wall plate not included

Range	Master	DGOZ-MOSW-M-RO
	Slave	DGOZ-MOSW-S-RO

## Overview

Modular momentary rocker switches for the RAPIX Lighting Control System which fit in standard Australian wall plate apertures.

The momentary rocker switches are available as Masters or Slaves. Master switches connect to a RAPIX eHub and each Master is capable of being connected to five Slave Switches.

Switches can be configured in RAPIX software to perform a wide range of functions and each module (Masters and Slaves) includes two software configurable LED indicator colours, white and warm white.

## Features

**Two configurable LED colours**, white and amber

**Fits standard Australian** wall plate apertures

**Master RAPIX modular switches** connect to the eHub and are powered via the eHub

**Slave RAPIX modular switches** connect to a master and are powered via the master

**Typical switch functions** include

- Toggle on / off
- Fade lights up or down
- Start or cancel a timer
- Recall a fixed level
- Toggle between off and the current level
- Issue a scene

**All commissioning** is carried on via Dignet RAPIX software suite. The configuration is downloaded to the eHub via a DALI line.

## Typical Applications

Commercial buildings  
Boardrooms

Education facilities  
Residential buildings

### Connecting to the eHub

Each master RAPIX modular switch is supplied with the following patch leads.

eHub to RJ-45 patch lead

Master RAPIX modular switch to RJ-45 patch lead

These two patch leads are used in conjunction with standard Cat5/Cat5e cable and RJ-45 connectors to connect master RAPIX modular switches in the eHub. See the pictures and diagram on the following page.

### eHub patch lead connections

Connection between a master RAPIX modular switch and RJ-45 patch lead

Connection between the eHub and RJ-45 patch lead

### Connections from the eHub to a master RAPIX modular switch

The diagram below shows the connections between the eHub and a master RAPIX modular switch. The maximum distance between a master RAPIX modular switch and the eHub is 100m.

### Connecting masters to slaves

Slave RAPIX modular switches connect directly to masters. Slaves have an integrated flying lead with a male connector. Masters have matching female sockets.
