DIXI SNOOT

The Dixi Snoot recessed downlight is an architecturally appealing low glare alternative to the standard downlight. It features a 20 degree tilt and 355 degree rotation. The Snoot component reduces glare and minimises light spill as well as being a distinctive attribute to the downlight. Suitable for use in retail, display, commercial, and hospitality.

20° Tilt & 355° Rotation

24° beam angle as standard

Available in 3000K, 4000K upon request

High CRI 90+

White Trim and White Snoot

Driver to be ordered separately (Phase, DALI, or 1-10V dimming options)
